4 Core Feedback Items

DELIVERABLE STATUS
Active / Implemented

EXECUTIVE OVERVIEW

QUALITY STANDARD VERIFIED

Following the staging review of the new Vision Business Setup web platform, leadership provided four specific structural, content, and visual feedback items. Our team performed complete technical diagnostics and implemented surgical enhancements to ensure the platform flawlessly reflects Vision's prestige, 10-year market pedigree, and client-centric ethos in Dubai. This document delivers transparent explanations, code-level root cause resolutions, and the concrete delivery schedule.

ITEM 04

**Content Authenticity &
Rewrite**

REWRITE ROADMAP

Item 1: Removal of Sequential Numbers on Core Values & Services

RESOLVED &
VERIFIED

Client Feedback: "Remove numbers appearing across Core Values and Services cards/carousels to ensure an ultra-clean corporate presentation."

TECHNICAL DIAGNOSTIC & CONTEXT

During initial UI development of the luxury carousel and service matrix, sequential numbers (01, 02, 03) and bottom index counters (01 / 07, 01 / 16) were incorporated as slide indicators. While technically functional, client leadership rightly noted that prominent numerical badges introduce an unwanted "step-by-step tutorial" appearance rather than an executive corporate showcase.

PREVIOUS DISPLAY

Values & services showed numerical badges (01 Trust, 02 Transparency) with 01 / 07 fractional counter below track.

REFINED DISPLAY

100% clean typography. Numbers removed; navigation preserved via sleek interactive geometric arrows and subtle continuous progress bar.

IMPLEMENTED SOLUTION & VISUAL IMPACT

- **Core Values Carousel (Homepage & About Us):** Stripped all index numeral tags (`item.num`, 01–07). Preserved the bespoke luxury photography, bespoke gold icons, and concise value descriptions.
- **Fractional Counter Removal:** Retired 0x / 07 text counter from the carousel footer. Replaced with an ultra-slim, branded progress track.
- **Services Matrix & Category Slider:** Removed all numerical prefixes across all 16 service cards and category tab headers.
- **Executive Aesthetic:** Resulting cards provide expansive breathing room, elevated whitespace, and cleaner card geometry aligned with premier UAE advisory firms.

Item 2: Mobile Header Phone Number Display ('050' Artifact Resolution)

BUG FIXED &
TESTED

Client Feedback: "On mobile screens, the header phone button displays only '050' instead of the full contact number or clear call action."

ROOT CAUSE DIAGNOSTIC

Deep inspection of the navigation codebase isolated the exact origin:

```
// src/config/contact.js
phones: [{
  display: '+971 50 545 9247',
  - shortDisplay: '050', // Caused
  truncation
  + shortDisplay: '+971 50 545 9247',
}]
```

The responsive component `MainNav.jsx` selected `phone.shortDisplay` on mobile breakpoints (< 768px). Because '050' was hardcoded as a legacy network prefix token, mobile viewports rendered the isolated three digits.

PERMANENT RESOLUTION & MOBILE DIALING QA

- **Full International Format:** Updated configuration across site data to render the complete official UAE phone number: +971 50 545 9247.
- **Interactive Call-to-Action Pill:** Formatted mobile header with a clear phone receiver icon and active `tel:+971505459247` protocol for seamless 1-tap dialing.
- **Cross-Device Testing:** Verified across standard screen dimensions (375px iPhone SE, 390px iPhone 14/15, 412px Samsung Galaxy, and iPad mini) ensuring zero horizontal clipping or line wrapping.

Item 3: About Us Page Flow (Direct 'Our Story' Opening & Redundancy Removal)

ARCHITECTURE
OPTIMIZED

Client Feedback: "Eliminate the redundant top hero banner on About Us. Open directly with 'Our Story' for immediate narrative engagement."

USER EXPERIENCE & ARCHITECTURAL ANALYSIS

The original page template included an overarching `PageHero` banner stating "About Us — Every Business starts with Vision" with a generic city backdrop. Immediately underneath, the visitor encountered Section 2: "Our Story: Established in 2015".

This created two visual issues:

- **Message Redundancy:** Repeating the company slogan delayed access to the substantive company narrative.
- **Excessive Scroll Depth:** Pushed key trust elements — the 2015 establishment badge and executive leadership photography — below the fold on desktop and mobile.

STREAMLINED LAYOUT HIERARCHY

Removed the standalone `PageHero` component completely from `AboutUs.jsx`. The page now begins with full executive impact:

- **1. "Our Story" Above the Fold:** Prominent Established in 2015 gold heritage badge, followed immediately by Vision's founding ethos and corporate advisory photography.
- **2. Our Founder (Viekram):** In-depth executive biography and leadership message.
- **3. Who We Work With:** Cross-industry breakdown (Real Estate, F&B, Trading, Salons, Manpower).
- **4. What Sets Us Apart:** 4 strategic pillars (Client-Centric, Uncompromised Quality, 24/7 Support, Strong Network).
- **5. Our Core Values & Commitment:** The 7 values followed by executive partnership guarantee.

VISUAL ARCHITECTURE FLOW COMPARISON

Previous Structure:

[Generic Hero Banner] → [Our Story] → [Founder] → [Sectors] → [Values]

New Streamlined Structure:

[Our Story (Est. 2015)] → [Founder Profile] → [Sectors] → [Values] → [Commitment]

CONTENT GOVERNANCE & EDITORIAL TRANSPARENCY

Item 4: Content Authenticity Clarification & Rewrite Roadmap

Full verification of original client copy integrity and the fast-track copywriting sprint for 100% bespoke inner service detail pages.

Part A: 100% Client–Original Copy Integrity (Reassurance & Audit)

100% AUTHENTIC & VERIFIED

Preservation of all foundational brand copy verbatim from *Website Content_Vision.docx*.

We provide complete reassurance to the leadership team: **No foundational copy was invented, altered, or replaced with generic placeholders.** Every core brand page strictly mirrors the client's approved copy deck:

PLATFORM SECTION	SOURCE CONTENT IN APPROVED DECK	INTEGRITY STATUS
Home Page Hero & Tagline	"Every Business starts with Vision"	100% EXACT MATCH
Our Story & Heritage	End-to-end setup, advisory role, Established in 2015, client-first principle	100% WORD-FOR-WORD
Who We Work With	Real Estate, F&B, Trading, Salons & Lifestyle, Manpower Supply	100% WORD-FOR-WORD
What Sets Us Apart	Client-Centric, Uncompromised Quality, 24/7 Support, Strong Network	100% WORD-FOR-WORD
Our 7 Core Values	Trust, Transparency, Understanding, Tailored Solutions, Quality, Reliability, End-to-End	100% WORD-FOR-WORD
Our Commitment & Founder	Long-term partnership promise, Vieklam's executive leadership biography	100% WORD-FOR-WORD
Jurisdiction Foundations	Mainland (100% ownership), Free Zone (0% corporate tax), Offshore (asset protection)	100% WORD-FOR-WORD

Part B: Inner Service Pages Architecture & Bespoke Rewrite Plan

FAST-TRACK SPRINT
ACTIVE

Explanation of temporary structural wireframes and the fast turnaround sprint to launch 100% bespoke copy.

WHY TEMPORARY INDUSTRY OUTLINES WERE USED

The client's initial document provided high-level service headings and bulleted scopes. In Sprint 1, our engineering objective was to construct a production-ready web application with **16 dedicated, full-page service portals** (e.g. Golden Visa, Corporate Tax, Bank Account Opening, License Freezing).

To engineer and validate the complex layout components—such as dynamic step timelines, document requirement grids, government fee estimators, and FAQ accordions—standard UAE industry reference structures were temporarily deployed as architectural scaffolding.

THE FAST BESPOKE REWRITE METHODOLOGY

- **Zero Generic Templates:** Every temporary reference is being replaced with 100% bespoke, original copy crafted specifically for Vision Business Setup.
- **Strategic Value Positioning:** Highlighting Vision's 10-year governmental channels, dedicated VIP relationship officers, transparent timelines, and rejection-free visa filing track records.
- **Regulatory Alignment:** Updating all guidelines (ICP, GDRFA, MoHRE, FTA corporate tax, Central Bank).
- **Turnaround:** Full copy replacement completed in parallel batches prior to production cutover.

SERVICE DETAIL PAGES REWRITE SCOPE (16 SPECIALIZED PORTALS)

Licensing (4 Pages)

- License Renewal
- License Modification
- License Cancellation
- License Freezing

Visa Solutions (6 Pages)

- Residence Visa • Golden Visa
- Freelance Visa • Remote Work
- Dependent Visa • Domestic Worker

Corporate & Support (6 Pages)

- Bank Account Opening
- Corporate Tax Guide
- Bookkeeping & VAT • Office Spaces
- VIP Medical/EID • Customs Reg.

QUALITY ASSURANCE & PROJECT DELIVERY

Implementation Matrix & Pre-Launch Roadmap

Unified status tracking across all feedback items and the step-by-step pathway to official production launch.

ITEM	AREA / MODULE	ACTION TAKEN / TECHNICAL EXECUTION	STATUS	TIMELINE
01	Core Values & Services	Stripped all numerical prefixes (01–07), indices, and progress counters; replaced with subtle sleek visual indicators.	COMPLETED	Immediate
02	Mobile Header Phone	Resolved '050' truncation bug in <code>contact.js</code> ; restored full +971 50 545 9247 format with tap-to-call action.	COMPLETED	Immediate
03	About Us Page Flow	Removed redundant PageHero; page opens directly with "Our Story" & Established in 2015 heritage badge.	COMPLETED	Immediate
04A	Core Brand Content	Verified 100% fidelity to client's approved copy across Home, About Us, Founder Bio, Core Values & Jurisdictions.	VERIFIED	Active
04B	Inner Service Pages	Executing rapid copywriting sprint: replacing temporary structural outlines with 100% bespoke copy for all 16 service pages.	IN PROGRESS	Sprint 2 Cutover

PRE-LAUNCH DELIVERY SCHEDULE

1 Feedback Fixes Items 1, 2, and 3 resolved, tested, and validated on staging environment.	2 Bespoke Copy Sprint 16 inner service portals populated with 100% original copy deck.	3 Client Final Review Staging walkthrough with leadership for final sign-off & approvals.	4 Production Cutover SSL security binding, performance optimization, and live domain launch.
---	---	--	---

ZERO-COMPROMISE ENGINEERING STANDARDS

Cross-Device Responsive: Full mobile, tablet, and ultra-wide monitor verification with zero UI clipping.

High-Performance Speed: Sub-second asset delivery, modern WebP imagery, and clean React 19 architecture.

Search Engine Optimization: Clean meta tags, OpenGraph schemas, and structured JSON-LD local business data.

Commitment to Excellence

"Our mandate is to ensure the Vision Business Setup web platform is an indisputable market leader in the UAE corporate services sector. The adjustments outlined in this report have been executed with precision, and we are on schedule for a seamless, prestigious production rollout."
